Martin Baset, while engaged in coupling cars at Fort Wayne, was caught between them and crushed so badly that his re-covery is very doubtful. He has been suffering intense agony ever since, and is burt inwardly. The doctors think that he can not live through the night. It is reported from Tacoma that the

It is reported from Tacoma that the Washington Territory steamer Ruby, while crossing Puget Sound, from Beattle to Port Madison, went down, with all on board, in a gale. The Phelps Dramatic Troupe were among the passengers. The report lacks confirmation.

Lanesville, O., held in the Odd-fellows man, the following ticket was placed in nomination: Mayor, Calvin C. Gibson; Marshal, Jerry C. Wolf; City Solicitor, William C. Blocksom; City Civil Engi-neer, J. P. Eagan; Trustee of the Water-

nearly torgotten his mother tongue, and speaks Indian fluently and rapinity. He was released from captivity six weeks ago in the northern part of Michigan and made his way to this place in search of his parents, who have long since left here and gone no one knows where. He is not able to read, and expressed a de-sire to procure an education. The fact of the abduction is remembered by per-

Kev. S. Muir, M. D. (formerly resident at Autwerp, N. Y.), has accepted an election to Grace church, Carthage, N. Y., and has entered upon his duties at the latter place.

Bismarck is by no means a finished not even a ready or natural, orator, he rises there is a general demand silence all over the House, with the ciamations, "He is speaking?" He in clines his body toward the Assembly winds his thumbs around each other, an casts an occasional giance at the House but he stops, hesitates, and sometime even stammers, and corrects himself; he seems to struggle with his words, which ascend unwisingly to his lips; after two or three there will be a short pause, when one can almost hear a suppressed swallow. He speaks without gesture feeling, or emphasis, and often falls in the accentuation of final syllables, so as to weaken his thought. One wonders if this is the man with a parliamentary co reer behind him of more than a quarter of a century, during which period he has been in every legislative body of his country, meeting with bitterest opposi-tion from the Liberal party in his early tion from the Liberal party in his early cateer, parrying their most caust o words in kinu, and replying, with wonderful presence of mind, by the wittiest impromptus or the most cutting sarcasm. It is the same man, and presently he will prove it. Gradually his speech flows with more warmth, and untolds its peculiar attraction: a series of original, fresh, gritty, and significant expressions, which tell more by their power than their beauty. His speeches are collections of sentences rather than the development of a smooth and logical train of reasoning. Thus, with apparently no cratorical power, he seldom takes the floor without confirming his nation in statesman such as Germany has never before enrolled in her annals, and whom the world at large may well envy her in

GOSSIP. GOSSIP.

I paid a water tax,
But on a wister's night
I found it froze up tight,
And worked with all my might
To know the facts.
I dug and thawed the mains,
And hired laborers true,
And paid them for it, too,
And when we came to view,
She'd busted Jourteen times.

She'd busted fourteen times.

Spring vegetables can not be expected yet, but it is getting almost time for bonnet bills.

While many people do not like the spring freshets, the bridges are quite carried away with them.

The one thing needful for the perfect enjoyment of love is confidence. Same with hash and sausage.

In Bourt.

The goods have been claimed by Messrs. Leigler & Co., of this city, by whom they were shipped to a firm at Middletown. The goods were stolen from the cars before they left the city. Capt. Martin and his men, who were sued by Thompson for trespass, with a claim for damages, have been released.

The new steam fire engine, recently sent for trial to Miamisburg, has, by order of the town Council of that village, been returned to the makers at Athens, O., as unsuitable.

An English Arctic Expedition An English writer says of the pro-An English writer says of the proposed arctic expedition:

Two ships are to proceed to the entrance of Smith's sound this year. One will stay there and set to work establishing depots northward; the other will sail northward, and when stopped by ice, or when, arrived at the furthest point from which it seems practicable to keep up communications with its consort, will, in the same spider-like fashion, begin stretching out a line of depots northward. This will be the work of the autumn and winter, of 1875; and in 1876 the advanced will be the work of the autumn and winter. of 1875; and in 1876 the advanced ship will send out a sledging expedition toward the pole, which, instead of carrying all its commissariat along with it, will find much of it cached in the depote of the previous year. Now, ten miles a day is good average sledging, and if the advanced ship steamed as high as the Polaris, it is argued that the sledging party might easily perform the five hundred and odd miles to the pole and back in one hundred days. We do not say it could not. But surely there is a flaw in this reckoning. Five hundred miles as the crow flies are one thing. But five hundred miles north, following along the cost is quite another. On the most care-

cost is quite another. On the most careful calculation the distance should, it may be imagined, be reckoned as double. Do what we will to lessen its dangers, that will be a tremendous undertaking. The majority of people who read glib vaguest notions of what such an expe-dition means. In the first place, there is the chance of the dogs dying, and withthe chance of the dogs dying, and without dogs it is quite certain we should never reach the pole, unless we succeeded in outsailing Captain Hall. Again it is not smooth ice that has to be traversed. A sledge has generally to keep what is called the ice foot or solid tee clinging to the shores of the straits, because in the center the ice becomes sooner rotten in the summer. Should this ice cease or become so rotten as this ice cease or become so rotten as Hayes and Payer found it, the party would have to take to the boat. For we presume no advance is to be expected along the snow and glacier-covered bor-der of the land itself. And here, where der of the land itself. And here, where the talk of an open sea may have made some people think the perils of the attempt will be over, it may very likely prove that they have only begun. Let any one recall to himself the dangers, described by so many graphic pens, which beset a strong ship manned by a full crew in the Poiar seas, and then think of a frail boat with its boat crew launching on what may be a stormy sea, with every peril from the ice as great or greater than further south. Surely, when those who for years have decried an expedition suddenly turn round and say that the foremost ship might ap-

say that the foremost ship might approach within five hundred miles of the pole; and, with the knowledge of sledge traveling we now possess, the distance there and back might be traversed in one there and back might be traversed in the hundred days, they are blowing hot much too soon after blowing cold. Such lan-guage in such a quarter argues either considerable ignorance or careless undervaluation of the hazards to be un-dergone. No; not all the experience of all the explorers that ever lived could

dergone. No; not all the experience of all the explorers that ever lived could make the expedition other than a terrible struggle against terrible odds. Our main hope lies in our steamer outstripping Captain Hall's. Could it do this, and do it early in the summer, the wisest policy might, after all, be to make the grand attempt this year. If immediate success is only to be won by good fortune, an immediate return in some shape is certain. And even if the present enterprise fails it will, we may be confident, do something to lessen the risks of future explorers. The same people who make light of the difficulties to be encountered now would be the first to throw cold water on a repetition of the attempt should those difficulties prove insurmountable. It is more prudent and more patriotic to be prepared for partial faiture. If Captain Nares can reach the poles, so much the better. If he can get beyond Hall and Parry it will be a grand contribution to future discovery. But-if he does neither, but simplye does his best, let us be satisfied, and determined never again to desist from the enterprize which is our birthright till patient toil is finally crowned by triumph.

by triumph. The semi-centennial anniversary of Methodism on Cape Ann was celebrated by meetings in the Eim street Church, at Gloucester, on Wednesday.

WHAT THE WIRES WHISPER. The bullion in the Bank of England in-creased £117,000 during the week.

The Attorney General of Pennsylvaniasays Good Friday continues a legal holiday under the act of 1869.

A dwelling house, owned by Samuel Cohel, in Logansport, Indiana, was de stroyed by fire yesterday. Loss about \$1,000. Cause of fire unknown.

Meetings have been held in New York of freight agents of Eastern and Western lines, but no definite action in the mat-ter of harmonizing rates could be arrived at.

George Steek, employed as a carrier for the Star in Tillin, O., was bitten on the aukle by a rabid dog, on Perry street. The dog was immediately shot, and the wound treated by physicians.

A dispatch from Prescott, Arizona, states that General Crook and stall have left for the Department of the Platte,

Caroline Walker, colored, and Ann

At the Democratic City Convention of

A white boy, eighteen years old, turned up in Fort Wayne yesterday, who was stolen from that city when five years old by a band of wandering indians; has
